

Why Partner With Us?

Partnering with the FIU Moss School of Construction helps build a strong industry by connecting the best of experience with the brightest of potential, benefiting the industry as a whole. Partner with us and become a part of the future of South Florida construction.

HIRE THE BEST STUDENTS

- The FIU MSCIS prepares students to enter the workforce with the skill set required to succeed.
- The FIU MSCIS holds twice yearly the Career Fairs, where companies can have access to our students and interview them on one day, in one convenient place.
- Industry Advisory Council Members have the advantage to schedule an Info-session where they have the opportunity to present their company to the entire student body.

PROVIDE GUEST LECTURES

- Our faculty is always open and eager to have industry experts come to our classrooms and share their knowledge with our students.
- FIU alumni have the additional opportunity to participate in the Panther Alumni Week.

PROVIDE SCHOLARSHIP TO STUDENTS

Students are often struggling to meet their financial responsibilities, many students have difficulties in their lives, yet they find the courage and enthusiasm to continue. You have an opportunity to help them overcome their obstacles and realize their dreams.

PROVIDE INTERNSHIP OPPORTUNITIES

- Although many of our students work, there are a number of students who have never had the opportunity to work for a construction company. They are in need of the experience that comes with a working environment.
- Companies benefit from the experience that students acquire during their internships.

PROVIDE JOBSITE VISITS

No classroom lecture compares to a good jobsite visit. Students have the opportunity to see how the work is done on-site rather than reading from a book or looking at pictures.

BECOME ADJUNCT PROFESSORS

The school is always looking for industry experts to teach our courses. If you have a master's degree in engineering, architecture, construction management, or a related field you can submit your resume for consideration.

PROVIDE PLANS AND SPECIFICATIONS FOR IN-CLASS PROJECTS

Our faculty is always looking for projects that faculty can use during a semester to assign students to prepare cost estimates, project schedules, project safety plans, project quality control plans, logistics and documentation

BECOME MENTORS FOR OUR STUDENTS

A Mentor – Mentee relationship can be a very rewarding experience for both. Help a student succeed!

BECOME MEMBERS OF THE INDUSTRY ADVISORY COUNCIL

- The purpose of the Moss School of Construction, Infrastructure and Sustainability Industry Advisory Council (IAC) is to support and promote the Construction Management programs at Florida International University's College of Engineering and Computing.
- IAC members have access to exclusive opportunities offered only to IAC members.

To find out how your company can partner with FIU MSCIS, contact Dr. Jose Faria at fariaj@fiu.edu or (305) 348-3541.
